

NATURAL LAMBSWOOL PAINT ROLLERS

We offer a wide range of premium quality lambswool paint roller sleeves, roller frames and floor applicators. Our products are made to the highest possible standards utilising premium quality raw materials and components and we feel confident that professional tradespeople and home renovators alike will appreciate their superior performance.

SLIP-ON SLEEVES

GENERAL DUTY ROLLER

Many manufacturers "spirally wind" their paint rollers (even lambswool). Our paint rollers are sewn by machine overlocker to prevent the seams lifting and separating from prolonged use.

Our paint rollers have several distinct advantages over ordinary synthetic rollers:

- The dense lambswool nap "picks up" more paint with each load and importantly releases it to the surface enabling greater coverage.
- Quick and easy clean up. These rollers clean out in a fraction of the time taken with ordinary rollers.
- Longer roller life. You just can't beat quality lambswool for durability!
- Ideal applicator for acrylic paints, texture coatings, etc.

Sleeves are available in **230, 280, 360 & 460mm** Sizes.

In the following nap lengths:

10mm (Short Nap)	All paint finishes on smooth surfaces
15mm (Regular Nap)	Smooth to lightly textured surfaces
25mm (Long Nap)	Semi smooth to heavily textured surfaces

Y-FRAME ROLLERS & SLEEVES

HEAVY DUTY ROLLER

Utilizing premium quality lambswool, "big bore" polypropylene tube and no glue in its construction, this roller is designed for those heavy duty applications such as epoxy work that involves the use of powerful solvents, or just when a simple "cage" style frame is just not up for the task at hand.

The roller is available separately, or complete with a robust mig-welded steel frame (able to accept a threaded extension pole) that will withstand the demands of the professional tradesperson, unlike some fragile plastic frames available on the market today.

For the solution to those heavy duty application needs, then you need look no further!

Y-Frame sleeves are available in **305, 380 & 460mm** Sizes.

In the following nap lengths:

10mm (Short Nap)
15mm (Regular Nap)
25mm (Long Nap).
