BUBBLEBUSTER® Spiked Rollers

Floor coating application is not successfully completed until it has been deaerated. Fresh floor coatings must be spiked with a **Bubblebuster®** spiked roller during application. The operation of spiking also largely contributes to the leveling of certain types of flooring compounds.

12mm and 31mm spike

Our Bubblebuster® Spiked Roller has become the brand that most contractors prefer for spiking coatings. Our rollers with 12mm spike are for all types of high build and self-leveling floor coatings. Our 12mm Super Sharp rollers are for fast setting coatings. Bubblebuster spiked rollers with 31mm spikes are for spiking floor overlays in excess of 4mm thick.

Bubblebuster® Spiked Rollers are available in a multitude of widths and are sold as complete assemblies with frames in standard form. Replacement roller refills are available in all widths.

Head width	12mm spike	12mm super sharp	31mm spike	Refill	12mm spike	12mm SS	31mm spike
100mm wide single arm	BB721100	BB721100SS	BB731100	Refill	721100R	SS721100R	731100R

Spiked Shoes for access

Our spiked shoes with 31mm long steel spikes are used to gain safe access onto new flooring overlay systems. They should be worn whilst working on fresh coatings and whilst deaerating the fresh surface when using our **Bubblebuster®** Spiked Roller. One size fits under most size users site shoe or boot with straps to secure to the users footwear.

Code	Description
